I had very little to do all day; Dor was quite busy on ATS jobs for Rita Schuman & Ron Hartough. Which she did not think she could turn over to me.

I got my time cd in - then spent most of the day putting on ATS the copy of the letter I had made for me of her recitation, "We Beg Your Pardon, America" - there were a no of gaps where I could not make out the words or phrases so I peroped a copy for her so that she can fill them in.

At my desk I was very sleepy & had arranged w/ Cathy Costello to lie down in an unoccupied off for an hr - however, Dor was in a conversational mood & started talking about relig & immortality & I could not conveniently get away - she did suggest I take some time off, because most of the staff was doing so in observance of Good Fri.

I went down to the Royal two

The menu was turkey, dressing, green beans, salad, cranberry sauce, rolls, & choice of cake or sweet potato pie & punch

After eating we went upstairs to see the play I saw skits were presented, the African dancers performed & the
