

29 Jan - Su

For lunch we had a sweet roll, as well as rice & coffee - we get extra food for Su morn. but as only 2 meals are served on Su

Job on Su morn. is performed on the same subject, as other days until noon etc for h.p. students who are on their site projects

Our grip of the food bank and orientation meeting at 9⁰⁰ - Lee Ingram & Judy James spoke & told us the rules & we are not to go in the trash alone or w/o permission - the hrs of work are from 6⁰⁰ to 6⁰⁰ - Lee finally found that the field workers are employed at 6⁰⁰ have a lunch break & the whistle blows at 6³⁰ - any couple which wishes to have a relationship must go by the Relationship Com - if approved they may be w/each other for 3 mos but have sexual relations - Judy applied for things of the field etc - she advised coming in for all cuts, etc because of the danger of infection

Most of the trouble in the field is due to the assignment - some of the students have classes in the morning but in the afternoon from 12⁰⁰ to 3⁰⁰ - teachers have a preparation period from 3⁰⁰ to 6⁰⁰ - the subjects taught are large cuts, math, Biol. Sci.

& languages plus the socialism class all
must take - the level of stud. abil. is
low - a project on sci. in rel. to. Sci.
development is planned - ^{instruc} ~~instruc~~
space are limited - ^{materials & off} ~~materials & off~~
records - perh. my secret skills can be
used in the morn. - I was at Tom that
my age was limit the amt of wh. I can do -
he suggested I audit the L.A. classes for a
couple of days - L.A. classes ^{in the h. q.} are taught by
himself, Dick Trapp, Janne Surwich, Shirley Hie-
lms, & Barbara Walker

I had lunch

There was a heavy downpour in which
I got caught - I had a long talk w/ Janne
Surwich who told me I can prob. - she
has had no teaching exp. nor methods
courses & doesn't know what material to
give her studs

I attempted to get my washing done but
couldn't hang it out because of the rain

The lunch is served on Sat - dinner
started at 3⁰⁰ - people had been promised
park today & 2 hrs were allotted -
however there was not enough meat to
give in a helping more than tiny pieces
mixed in a huge amt of rice w/ vegs -
many were disappointed - I on the cond-
spher responded to complaints, explaining

29 Jan - 56 - 2

the cod factor & that they got more protein than they find - I called for the Inverton police under the leadership of Ronnie James - D'Almeida is one of his workers & I think they were to make sure that the child, in partic., cleaned up their plates

I got a visit to Bates - she lives in an area in the mines' of where many of the snags who have been jobs are - Bates told me she had had some illnesses - she is in charge of crews who keep watch over the generators & over the banana shed - the bananas which hang in plain view are a temptation - she told me that Chikens had given a good deal of trouble, apparently while still in the states, & had tried to take his child out - I suppose at this time he was assigned to the plant nursery

Coincidentally, I saw them on the way home - he was putting earth around plants - She was not very cordial to me - didn't remember giving me any message on the radio - I inquired what was going by. When he told me that he was in the nursery - he said that Herried Tropp did what she was doing, & that the TC has attorneys in Georgetown

I saw Penny Kerns - she is in charge of the Learning Crew, to which people are assigned for misbehavior - she also seems to share some responsibility w/ Karen

Layton, who compiles evaluations on
work - Penny inquired of me about
Andy Silver, in whom I did not
know she was interested

Today parents can be w/ their child. -
Diane & the others in our cottage
had their child in our cottage this eve. -
I spent my time sorting articles in my
luggage

I have been constantly constipated
since arriving in Guy & now I have
diarrhea

Red Amer. Medication

Went to bed about 10⁰⁰
