

30 Jan - M

Got up at 7⁰⁰ & had shower
Took a shower, did pers chores
Went to lunch at 12⁰⁰

Sat in on h.s. Eng classes, the first
conducted by Joan & Tom, the Basic grp -
then observed the Adv. grp taught by Dick
Trapp

At 3⁰⁰ attended my ^{h.s.} Eng. Tchrs' mtg - the
classes were described for me & the shortage
of bks & supplies & I suggested that we send
a request by radio that travelers coming to
Jonestown bring them, as we have had supplies
11/2 more of them shipped from the States
have arrived - many are tied up in customs
in Georgetown - there was some disc on
methods of teaching, leading to the prob of
whether to teach Standard Eng, Black Eng. or
a combination - Trapp's opin prevailed:
encour. use of Bl. Eng for oral convers.,
learn stand. Eng for other purposes

The topic of how to use me in the h.s. Eng
prog was approached - I realized w/ some
already set up that they didn't have much
need for another Eng teacher - I proposed that
I teach a course in Eng for adults & wh
individually w/ Adv. students - this was
agreed on

The loudspeakers all day carried admonitions

(over)

C-2-A-7 (13)

from J. - an especially severe one was
on Velitism - there was to be a meeting
of the Agric. & Screening Coms at 7.15 - it
was mandatory for all to attend

I stayed in the central area - had a
convers. at dinner w/ Mary Hotherapoon - she
manages the coveva mill

At the meeting I directed that names be
taken of those who were late - some of the
topics discussed were: (1) Anthony & head
of the chicken op. was resp. for 75th baby chicks
being killed (2) all must put in time in the
fields, at least one whole day every mo. working
in agric - all must get in a sched. of their
daily activities (3) complaints were heard about
Marie Lawrence, that she was not on the job
as her of the Landscape & Poison Coms. - the
7 children who had died & been saved by J
just by my arrival had been poisoned by
insecticide which was left about, I gathered,
by Mike Lund (Puzgater) - there was much
talk of the proper disposal of such poisons
& further provisions which should be made
by Marie's com. (4) detailed rpts were heard
from those in charge of pigs, cows, chickens -
proposals were made for making a pond to
raise ducks & fish (5) there was communica-
tion by radio w/ S. Iren. - Diane Wilkinson
asked to speak to one of the Simon girls - J.
tho' Diane was attracted to her, tho' the
Simon woman sd she was not aware of it -

30 Jan - M

I commented that he had no objections
to Lesbianism @ I complained of the no
of thrs people were writing to friends &
relatives outside of the Te & the cost of foreign
postage

The entry ended at 1⁰⁰
