Helen Love & I walked up to the Toddler's place - ^{called the nursery} I want to get out & see some nature every Su of Jan, & this is about as far as she can walk - she sat inside the play while I walked along the stream - Helen's job is sorting rice & she like to have another job as this is monotonous. - Jerry Bailey is her supervisor & Jerry is officious

Helen told me Gene Chaikin gave trouble by he left the States & that mother had a diff. time w/ him - she that he had conspired w/ our enemies - I agreed to keep him on in the nursery job, but everyone was to watch him

J's comments came over the loudspeaker - he complained about some of those who helped QSOing, because they th. a real interest in what was happening in the States - I impressed upon them that empty lives people live there - they are so bored they want hrs to talk w/ him - however, what he tells about his integrated gov. he finds they don't like that idea

When we got back about 3:30, dinner was being served - this was the fried chicken dinner from our own chickens - I sd they killed 300 chickens & an expense of \$2000 - the next batch must be sold - each had
